

# THE PHC CERNER LEARNER

From the desk of Dr. Janet Simons

Your by physicians, for physicians source for CST Cerner information at PHC

## FIND IT!

It's hard to find certain things using the search functions within Powerchart. I am piloting a new Cerner search tool in collaboration with PHC Health Informatics. We are looking for feedback and ideas for new entries and search terms. Check it out here:

[cernerlookup.sandbox.providencehealth.cloud](http://cernerlookup.sandbox.providencehealth.cloud)

and be sure to leave feedback using the button in the top right corner.

## PATIENT LIST

As promised, an update on the current situation with printed lists. The following key changes have been requested and will be implemented soon:

1. Remove 'primary contact'
2. Diagnosis lists top 3 only
3. Code status shortened

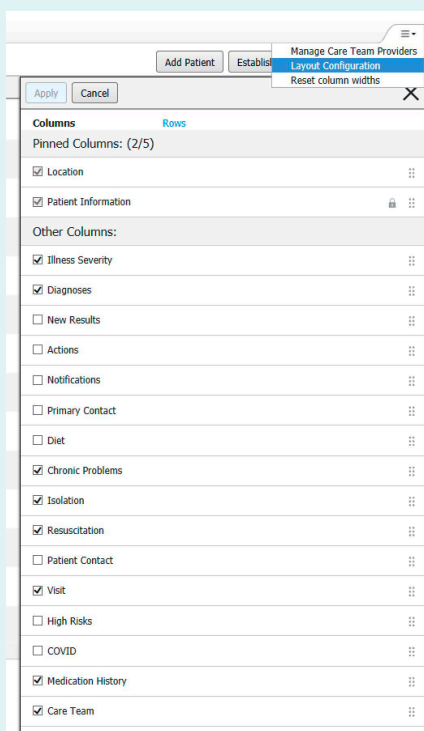

On detailed list only:

4. Medications shortened, grouped by scheduled and PRN
5. Situational awareness and Actions for your Care Team only

Here's what the simplified list might look like:

## THIS WEEK I LEARNED

I have been looking for years for a way to display the Attending Physician face-up on my patient overview. Turns out it was there all along! Just add the 'Care Team' column to your Patient Overview by clicking on the 'hamburger menu' and then 'Layout Configuration.' Once you've added the column, you'll have to click in one of the boxes in a patient row to open a side panel. From there, select 'Display Physician' and viola! The attending physician now displays on your Overview. Now's also a good opportunity to clean up your columns on Patient Overview if you haven't for a while. See below for my suggestion on which columns to include:

## ALSO IN THIS EDITION

Check out pages 2 and 3 for:

- Wildcard searching for clinics and physicians to cc on notes
- Leaving comments on results when you review them in message center

### Physician Handoff

Location	Patient	MRN	Illness Severity	Diagnosis	Code Status	Admit Date
SPH 5A 5AL - 05	TESTTEST, RAACTEST	740018759		<ul style="list-style-type: none"> <li>• Migraine</li> <li>• Normal Pregnancy</li> </ul>	5-No CPR, Critical Care, May Intubate	23-MAR-2022
SPH CICU CICUL - 12	CSTSNBREAD, BUILD SOURDOUGH	740004062		<ol style="list-style-type: none"> <li>1. NSTEMI (non-ST elevated myocardial infarction)</li> <li>2. Angina</li> </ol>	Attempt CPR, Full Code	31-JAN-2022
SPH ED Hold RHALL - 02	TESTCARDX, ED	740012180		<ol style="list-style-type: none"> <li>1. Failure heart congestive</li> <li>2. COPD exacerbation</li> </ol>	Attempt CPR, Full Code	21-JUL-2020

# HOW TO LEAVE COMMENTS ON REVIEWED RESULTS

When documents, labs, and medical imaging land in your message center, you are able to leave a comment on these results in the Action Pane.

**Action Pane**

Review     Refuse    Reason:

Additional Forward Action:  To:  (Limit 5)

**Comments:**  (Limit 212)

Comments

Comments left in this way become part of the record attached to that result, and can be viewed later by pulling up the 'Action List' for that result. For documents, pull up the bottom pane when viewing the document in the 'Documents' tab:

# WILDCARD SEARCH

Finding the listing for the person or clinic you want to get a copy of note can be frustrating. The default search only looks for exact matches, based on the start of the 'name':

While the fact that the search is not smarter than this is a source of great dismay for me personally, there is a trick which can make it more tolerable to try to CC the Diabetes Clinic on your note. Using an asterisk \* with your search terms forces the system to look for that word anywhere in the entry rather than just at the beginning. You must place the asterisk at the **beginning** of your search term:

This trick *only* works in the 'Provider Selection' window (which comes up when you search to add a CC document or test result) – it does not work elsewhere in Cerner. Because of course.
